

## Day & Night Signal - Technical Specifications

A very compact personal survival signal incorporating a red flare at one end (for use at night), and a dense orange smoke at the other (for day-light). The flare end is ribbed to aid identification at night, and both ends are fully waterproof with 'O' ring seals. Either end can be fired independently and the signal can be doused in water after firing, allowing the unused end to be stowed until required.

Operation (identical for both ends)

1. Select the end to be used
2. Remove the cap and unfold "D" ring
3. Point down wind
4. Pull and twist off "D" ring

After use allow the signal to cool or douse in water and retain for future use of the other signal

## Standard Features

<b>Length</b>	139mm
<b>Width</b>	42.5mm
<b>Overall weight</b>	28gm
<b>Explosive content</b>	93gm
<b>Smoke burn time</b>	18 seconds
<b>Flare burn time</b>	20 seconds
<b>Flare light intensity</b>	over 1,000 candlepower

## Technical Specifications

- **Combined smoke and flare personal survival signal**
- **For day and night use**
- **Waterproof to 30 m**
- **Ideal for Divers**
- **Burn time, red flare 20 seconds at 10,000 smoke 18 seconds minimum**
